

Product features Klikseal®

Height of only 17-20 mm, 5,7 mm on the outside irrespective of size. Cable glands are approx. 30-40 mm.

Handles exceptionally large range of cable and pipe diameters.

Installation time saving of up to 90%.

Integrated tension relief

Self-adjusting to wall thickness 1,5-5 mm.

Ergonomic installation

"Pushout" membrane

Fixed in both directions when mounted.

Space saving design

IP67

KLIK = No material compression during installation.

Rubber coated tension relief for protection of the cable mantle.

Center the KLIKSEAL in the opening (from the inside), push evenly with both thumbs until it "klicks" into place.

Insert the cable from the side with the polyamide tabs.
